¹ Applies only to components with a U-value (Heat transfer coefficient) > 0,4 $\frac{W}{m^2K}$. With a U-value < 0,4 $\frac{W}{m^2K}$ the country-specific requirements must be observed.

² The heat protection in front of mounting surfaces without flammable building materials and without built-in furniture on the back ("not combustible wall") must be provided with 8cm reference insulation or equivalent replacement insulation (for Silca 250KM = 50mm).
